

PLEASE not not allow the NAB to censure satellite radio.
I travel cross-country extensively and find the use of satellite radio invaluable. The traffic and weather information is very beneficial for knowing what is in store down the road before you arrive; and not being surprised when you get there. Satellite radio provides a service that other "local" stations cannot - I can tune in to what I want and not worry about losing the station and having to fumble with the radio while I'm driving.

We, who have satellite radio, pay for the service and should be able to receive the programming we want.
